How to add a regular payment

This process is the same for both a GIA and ISA. This guide follows the steps for an ISA product.

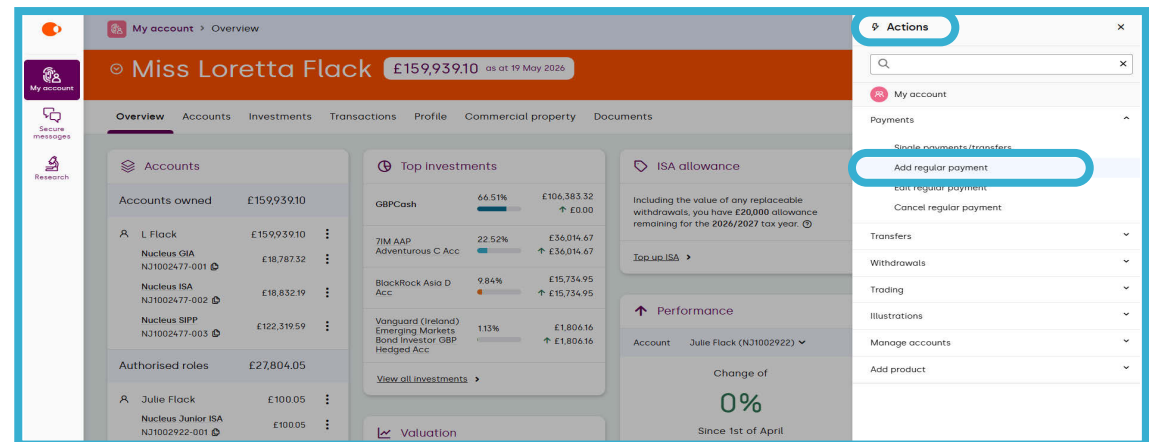

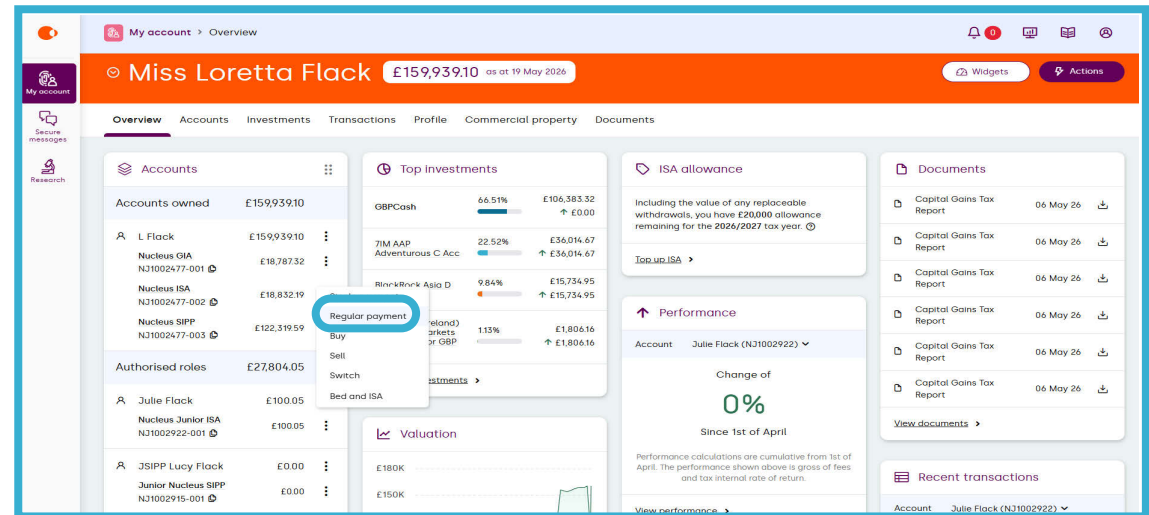

Once logged into your account, you'll arrive at your overview page.

There are two ways to access the application.

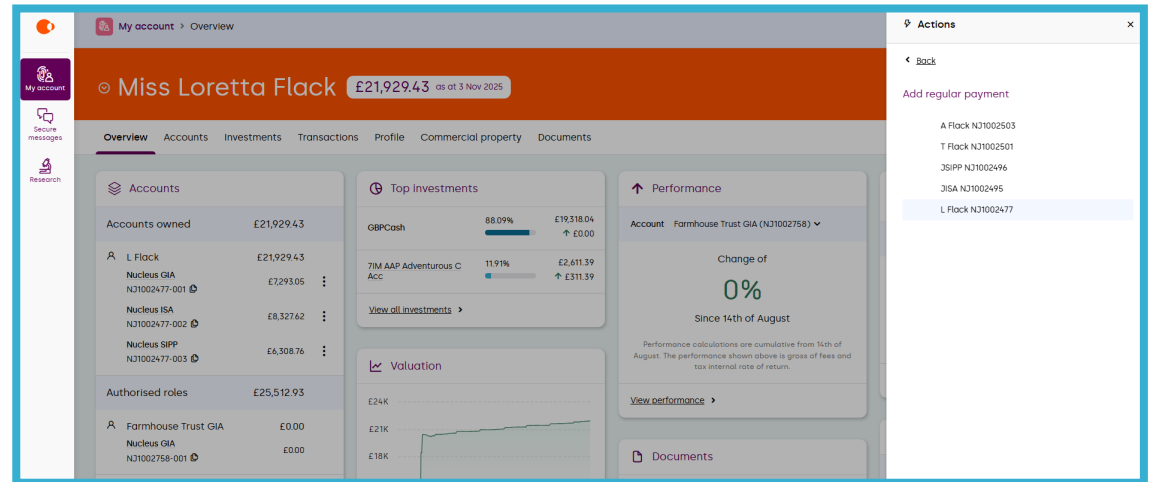

Option 1 – To add a regular payment to your investment. You can select the vertical ellipsis (three dots) next to the product in the 'Accounts' widget, then select 'Regular payment' to go directly to 'Payments in'. This route skips the account and product selection screens described below.

Option 2 – You can select the 'Actions' button in the top right-hand side.

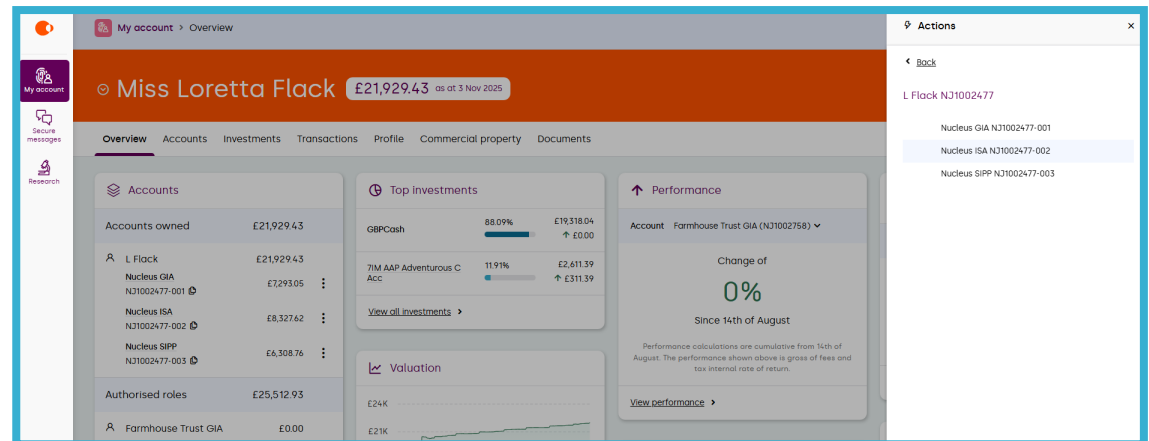

If selecting 'Actions', next select 'Add regular payment' from the dropdown menu

Select the account that holds the product you want to make a payment/transfer to. This may have multiple entries if you are linked to another accounts.

Next choose the product you want to make a payment/transfer to.

Payments in

Select 'Yes' to add your regular payment.

Follow the details and add the amount into the 'Regular payment' box. Select the payment frequency, and confirm the first collection date.

i The date selected is the earliest date the first payment could be collected. We'll need to receive a signed Direct Debit Instruction confirming the payer's bank details before we're able to start collecting payments. If it's not possible to collect the payment on this date, the first collection date will roll forward based on the frequency selected. The first payment date will continue to roll forward at the frequency selected until all outstanding requirements are met.
