What can I hold in the Nucleus Platform Offshore Bond?

The Offshore Bond can invest in the funds available on the platform, including as part of a model portfolio. These funds are a mixture of regulated unit trusts and Open Ended Investment Companies (OEICs).

Investing with RL360

- Ownership of an asset must not be restricted in such a way as to prevent it from being available to other policyholders.
- RL360 does not accept liability for loss of performance or investment opportunity as a result of any decision it makes to decline an asset.
- RL360 reserves the right to amend the permitted assets at any time, providing that at all times any such amendments comply with Regulation 4 of the Personal Portfolio Bond (Tax) Regulations 1999 of the United Kingdom (and any subsequent amendments).
- RL360 reserves the right to adjust the returns for investments to reflect any levy or charge made on it under the Isle of Man Life Assurance (Compensation of Policyholders) Regulations 1991 or similar legislation.
- Insurance bonds issued by other life assurance companies are not acceptable.

Liquidity

Please note that there can sometimes be difficulties in selling an asset. This could be due to a number of factors, including events such as:

- insolvency of the investment
- adverse stock market conditions
- selling restrictions placed on funds by their managers, for example, suspension of redemptions.

In circumstances like these, you might not be able to sell your holdings in a timely manner, and the value of those assets could fall.

You should consider the liquidity of the assets you purchase, and your options if they can't be sold on demand.
