

Request immediate drawdown for new business cases

Nucleus platform user guide

Edition 13

Date of publication 05/2026

Introduction

This document provides a guide on how to request full or partial drawdown of a Nucleus Pension for the following scenarios:

- New client to Nucleus.
- Existing client applying for a new Pension account for immediate drawdown (if the client is transferring a pension for immediate drawdown, the pension application needs to be made first for the transfer in to be applied, and we then create the drawdown account).
- Client topping up their existing pension account for immediate drawdown.

Please note that the screen images may not reflect changes to the Lifetime Allowance.

Please note: If multiple transfers are included in a crystallisation instruction and you request payment of PCLS before all transfers have been received, you may be required to submit a further crystallisation request once we are in receipt of the final transfer. This will allow drawdown to be processed on the remaining value held in the pension.

Guide

New client to Nucleus

Please refer to our [new clients and new business user guide \(0061\)](#) for guidance on how to set up a new client.

Once you've created your new client on the platform, follow the steps below.

Existing Nucleus client

At the client hub page, search for your client and then select 'apply/top-up'.

The screenshot shows a web interface with two main sections: 'Add client' and 'Search'.

Add client section:

- Buttons: Individual, Corporate, Trust

Search section:

Enter the details of the existing client for which you wish to search. Use '%' as a wildcard.

Surname	Forename	Date of birth	Account number	Client reference
<input type="text"/>	<input type="text"/>	<input type="text"/>	N333332	<input type="text"/>

Search results

(1 of 1) [Navigation icons] 10

Name	Client reference	1st line of address	Postcode	Date of birth	
Example Jack	10000002	55 Main Street	S10 1LL	05/05/1948	<input type="button" value="Apply/Top-up"/>

(1 of 1) [Navigation icons] 10

If you've already selected the client, you can select 'top-up/add investment' from any of the clients' portfolio pages:

Type	Name	Account ID	Joint owner(s)	Assets in/out	Money in	Money out	Valuation	% of portfolio
Drawdown		N122222		£0.00	£0.00	£0.00	£288,919.47	37.59
Drawdown		N222224		£0.00	£162,341.50	£40,585.38	£163,902.96	21.33
Isa	Isa	N333332		£8,386.89	£40,095.26	£0.00	£53,438.77	6.95
Pension		N444444		£281,905.90	£323,597.88	£162,341.50	£262,268.99	34.13
Memo assets							£0.00	0.00
Portfolio Total				£300,292.79	£526,034.64	£202,926.88	£768,530.19	

You may now add a 'new account' or top-up an existing account. From the drop down menu for new accounts, select the appropriate account type then click on 'add'. Remember, if this is a pension transfer in and the client is going into immediate drawdown please select the pension account.

Application for Jack Example

Select Account

New accounts

Select the account type you wish to open: Pension Add

Account holder	Give the account a name	Contribution type	Other account holder(s)	Annual Advice Fee	
William Carr	<input type="text" value="Pension"/>	<input type="checkbox"/> Payments <input checked="" type="checkbox"/> Re-register <input checked="" type="checkbox"/> Transfer <input checked="" type="checkbox"/> Immediate drawdown	<input type="text"/>	0.5 %	<input type="button" value="X"/> Remove

Top up

Select the account you wish to top up: Isa - N333332 Add

Select the contribution type(s), enter the 'annual advice fee' and click on 'next'.

Transfers

Using the drop down menus, enter the ceding scheme details, plan number and current value.

Initial fee

Please note: as this is an instruction for immediate drawdown, please do not request an initial fee on the 'transfers' section as the initial fee will not be processed on the Pension account. Instead, a few steps later in this application, there's an 'adviser fee' section for you to initial and annual advice fees) for the drawdown account. The initial fee will be deducted from the drawdown account after PCLS has been issued.

If you have more than one transfer request, click on the 'add another transfer request' box to continue to add more ceding schemes.

Application for Jack Example

Transfers

Pension - Pension

Ceding company	Ceding company address	Account/Plan number	Current value
Aegon	EH129SE <input type="button" value="Find address"/>	1234	100000.00
	Scottish Equitable Plc	Initial fee	
	Edinburgh Park	1.5 %	
	1 Lochside Crescent		
	EDINBURGH		

+ Add another transfer

Back Next

Re-registration

Enter re-registration details. When searching for assets, it can save time if you type the first few letters of the asset then '%' and click 'search'. An asset list will pop up for you to select from.

You can continually add assets for this ceding scheme and when they're all present, tick the client authority questionnaire and click 'next' to move onto the next section.

We always recommend that you obtain an up-to-date valuation from the client or ceding scheme to ensure that the asset type selected is correct, e.g. 'B accumulation' and not 'B Income' and that the unit amount is accurate.

If you select 'the assets are held in my own name' we'll pre-populate the stock transfer forms for you. If this box is not checked then the stock transfer forms will be blank.

Application for Jack Example

Reregistration

Asset selection

Please note

1. There are various options available for you to select to invest your contribution types, however we can only apply transfers and lump sums as 100% cash.
2. In order to move to the next step of the application, please overtype the pre-populated cash box from '2' to '100'. The contributions may only be applied as 100% cash.
3. If you do select a model portfolio, favourite assets or create an asset list, this instruction will not be processed and instead all funds will be applied as 100% cash.
4. Model portfolio and rebalancing options are copied from the Pension to the Drawdown account.

When your 'asset selection' choice has been entered as 100 for cash, click 'next'.

The screenshot shows the 'Asset Selection' step of the application process. At the top, a navigation bar includes steps: Account, Transfers, Rereg', Payment & Withdrawal, Asset Selection (highlighted), Immediate Drawdown, Account Specific, and Confirm. Below the navigation bar, the title is 'Application for Jack Example' and 'Asset Selection'. There are 'Back' and 'Next' buttons. A message states: 'Please allocate the percentage of each asset that you would like to add to each account. The overall percentage allocation must equal 100, and there must be at least a 2% cash allocation for each account.' The form is for 'Pension - Pension' and includes search fields for 'Asset search' (Name/ISIN/SEDOL) and 'Model portfolio search' (Name). A table shows the asset allocation:

Asset name	Lumpsum	Regular	Transfer	Nat. income	Action
Cash Account Pension (Cash Pension)			100.00		
Total			100.00		

Below the table are icons for 'View Charges', 'Reset fund list', 'Create favourite assets list', and 'Copy funds to all'.

Immediate drawdown

The first part of the 'Immediate drawdown' form details the lump sum allowance. This section will auto-complete for you as the rest of the drawdown details are entered.

The screenshot shows the 'Immediate drawdown' step of the application process. At the top, the title is 'Application for Jack Example' and 'Immediate drawdown'. There are 'Back' and 'Next' buttons. The form is for 'Pension - Pension' and includes a 'Drawdown type' dropdown set to 'Capped'. Below this are input fields for 'LTA %' and 'LTA % total', both set to '0.00'.

Drawdown details

The 'drawdown options' are either 'full' for full drawdown or for partial drawdown select either 'amount' or 'percentage'.

Full drawdown

Please ensure you send us a signed [pension drawdown form \(0028\)](#), which is available from the library.

When you select 'full' as the drawdown option, the 'drawdown details' section auto completes.
The drawdown amount and pension commencement lump sum (PCLS) amount (25%) are displayed in light grey.

Drawdown details	
Please select a drawdown option	
Drawdown options	Full ▼
Drawdown amount	310,830.06
Drawdown %	100.00
Please select a PCLS option if required	
PCLS option	Percentage ▼
PCLS amount	77,707.51
PCLS %	25.00
Please select a phased option if required	
This will repeat the crystallisation on a regular basis	
Frequency	None ▼

Partial drawdown

Drawdown options

Select (cash) 'amount' or 'percentage' to enter the required drawdown value.

Drawdown details	
Please select a drawdown option	
Drawdown options	Amount ▼
Drawdown amount	10,000.00
Drawdown %	3.22
Please select a PCLS option if required	
PCLS option	Percentage ▼
PCLS amount	2,500.00
PCLS %	25.00
Please select a phased option if required	
This will repeat the crystallisation on a regular basis	
Frequency	None ▼

Phased drawdown

If a regular, phased drawdown request is to be set up please refer to the [phased drawdown user guide \(0475\)](#) from the library for further details.

Please be aware that if a client holds any Protected Tax Free Cash, then a phased drawdown request would mean this is lost if not taken in one crystallisation.

PCLS option

Please ensure you send us a signed application form or drawdown form and refer to the declaration guidance at the end of this guide.

The easiest option is to select percentage (25%) as the amount is then auto-calculated for you. However, if you wish to state a specific amount, the 'drawdown %' is then auto-calculated for you.

You can select less than 25% as an amount or percentage however please note, you cannot request the remaining PCLS from this drawdown request at a later date.

What is transferred from the Pension to the Drawdown account?

When processing drawdown, we first take the required drawdown amount from available cash, leaving 0.17% in available cash for fees/charges etc. on the pension. The rest of the assets are transferred on a proportional basis. For example, if a fund takes up 4% of the pension account valuation, then 4% of the value required for drawdown is transferred from this fund.

Auto-disinvestment for PCLS and fees

If there's insufficient cash to pay the PCLS and/or an adviser initial fee from the drawdown account, the available cash is ring-fenced (moved to reserved cash) and the assets are sold down proportionately to create the required cash amount. We ring-fence the available cash to ensure it's not used for other processes e.g. rebalancing.

After PCLS is paid to the client the initial fee is calculated from the valuation of the drawdown account and paid out.

Please note: cash is not ring-fenced until we've received the relevant application paperwork and start processing the drawdown application.

PCLS will not be released until there's sufficient cash to pay out the PCLS and maintain the minimum 0.17% cash balance requirement. If cash is not available, auto-disinvest will sell down the appropriate assets and PCLS can then be paid out when there's sufficient cash available. If you choose to sell assets in the Pension account in advance of submitting the application, we would recommend you consider this plus the first income payment to avoid any delay.

I want specific funds moved into drawdown

We don't have the functionality for you to select specific funds for drawdown online however we can manually process this for you. Please print the [pension drawdown form \(0028\)](#), which is available in the library, and post the signed form detailing the funds for drawdown specifics i.e. total cash, asset names and units.

Please ensure there's available cash in the pension for the PCLS to be taken or instruct a sell before posting the drawdown documentation.

Adviser payment details

'Annual advice fee' can be keyed as a percentage or an amount.

- Where the annual advice fee is set to a percentage, the fee is calculated daily and paid out monthly
- Where the fee is set to monetary (£), the annual amount is split over 12 months and the amount will be paid in full each month (i.e. £2,000 / 12 = £166.66)

'Initial fee' can also be keyed as a percentage or an amount. The initial fee payment is calculated from the valuation of the drawdown account after the PCLS has been paid out.

Adviser payment details	
Annual advice fee	<input type="text" value="0.5"/> %
Initial fee	<input type="text" value="1.5"/> %

Please note: When processing a partial drawdown request, if a flat fee (shown as a £ amount) is being set up on the client's Pension account, this fee will automatically be copied to the Drawdown account. This will result in the client being charged the fee twice. You can amend the fee on this screen. If the fee also needs to be amended on the Pension account, please return to the start of the online application to make the required changes.

Income payment details

The 'max GAD income' is auto calculated for you. The rest of the sections to complete are set out depending if you select '% of GAD', 'Amount', 'max GAD' or 'no Income' as the payment option.

% of GAD: select this if the client does not wish to take the maximum GAD income (select up to 120%).

Amount: key the specific amount the client requires (subject to the 120% limit).

Max GAD: select to ensure client receives the maximum income they are entitled to. The '% of GAD' field then defaults to 120%.

Please note income is subject to tax which is deducted before the client receives their pension income payment.

Income not required?

Leave this section at nil income if the client does not wish to start income at this time.

Income payment details

Max GAD income	<input style="width: 80%;" type="text" value="3,318.75"/>
Payment option	<input style="width: 80%;" type="button" value="Max GAD"/>
Frequency	<input style="width: 80%;" type="button" value="Monthly"/>
% of GAD	<input style="width: 80%;" type="text" value="150.000"/>
Amount	<input style="width: 80%;" type="text" value="276.56"/>
First payment date	<input style="width: 80%;" type="text"/>

In addition to keying the income on the crystallise screen, if there's a taxable income payment, the gross amount should be stated in the opening comment of the Jira (or email if you don't use the Jira system) when you submit the drawdown paperwork to us.

For all future ad-hoc taxable income payments we require the following depending on the type of drawdown account:

- Flexi access - cash should be made available and a 'Drawdown - income only' Jira should be raised for us to process.
- Capped without ongoing regular - the suspended income should be reactivated via maintenance and set to annual for the withdrawal amount required and payment date. This will trigger overnight (or nine business days in advance if date set for payment to occur in more than nine days time) and must be re-suspended via maintenance once triggered so a further payment doesn't go the following year.
- Capped with ongoing regular - the active income should be amended via maintenance and set to annual for the withdrawal amount and payment date required. This will trigger overnight (or nine business days in advance if date set for payment to occur in more than nine days time) and should then be amended via maintenance once triggered back to the regular withdrawal amount/frequency. If this overlaps with the regular withdrawal you can set the annual amount to include this and then set regular back up for following month.

For capped ad-hoc where auto disinvestment is switched on you don't need to place a sell as this will be done automatically when the withdrawal triggers and pays out nine business days later. If cash is already available and date is set for less than nine business days this will trigger overnight and payment will reach the client on the set date as auto disinvestment is not required.

First payment date

To make sure we can process the first income payment on the elected date, please select a date for a minimum of 10 working days (provided the cash is available) from the date we should receive the application paperwork. If there's any doubt, please contact our client relations team for guidance on 0131 226 9535 or email client.relations@nucleusfinancial.com.

If we're unable to pay the client's first income on the elected date, we'll pay out the first single income payment on the first available date and continue income payments on this date each month thereafter (if this is the requested frequency). You can change the income payment date in the 'account maintenance' screen when the drawdown account has been opened.

Bank account details for PCLS

Clients' bank account details are pre-populated. If we hold a record of multiple bank accounts for the client, select the required bank account from the drop down list which appear at 'account name'.

If the client wishes to pay PCLS to an existing General account, select the required account from the dropdown list which appears at 'designate funds to existing account'. If the client doesn't have an existing General account this option cannot be selected.

There's no need to submit a top up on the existing account, the PCLS will be applied to the existing General account as 100% cash and you'll then be able to place any required investments.

The screenshot shows a form titled "Bank account details for PCLS". On the left, there are four input fields: "Account name *" (a dropdown menu), "Sort code", "Account number", and "Roll number". On the right, there is a section titled "Designate funds to existing account" with a dropdown menu showing "General - N335662" and a blue button labeled "General - N335662".

Is a different bank account required for PCLS?

If the client requires the PCLS to be paid to a bank account that we don't hold a record of, we require a signed client instruction to add the new bank account to the platform. Please complete our [client bank details form \(0136\)](#), which is available in the library, and send it to us via jira messaging. Alternatively, you can post the form to our client relations team.

When the request has been processed, you can then proceed with the application as the bank account will be available for selection from the updated bank account list.

Income payment

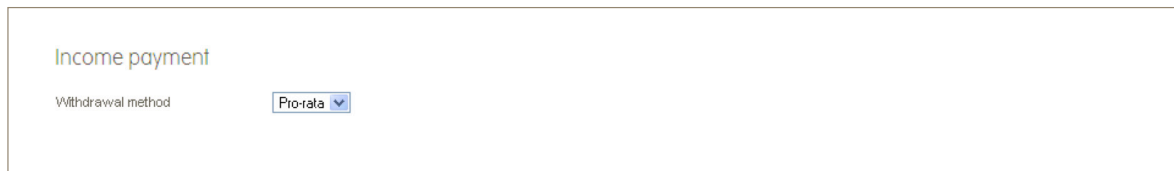

Withdrawal method

Income payments can only be paid from available cleared cash on the Nucleus Drawdown account.

Please select from the following two options to advise how the income payments should be managed:

None: if you intend to monitor the account, please ensure there is sufficient cleared cash to meet the withdrawal.

Pro-rata: if you wish us to monitor the cash element of the account, auto-disinvestment can be set up to automatically sell-down your client's holdings to meet the pension income amount. We also sell an additional 0.17% to restore the cash balance to meet the minimum cash requirement. Please be aware some assets may be excluded from auto-disinvestment such as monthly traded and suspended assets.

The screenshot shows a form titled "Income payment". Below the title, there is a label "Withdrawal method" followed by a dropdown menu. The dropdown menu is currently set to "Pro-rata".

How can I change Income choices?

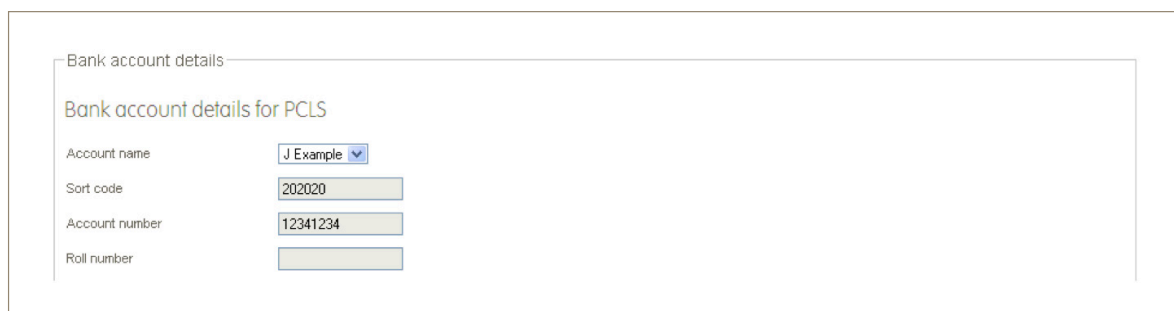

If the client wishes to change income frequency, amount or date, please raise a request through our query system Jira and we'll process this for you.

How can I stop funds being sold pro-rata to fund income?

If you only wish specific units to be sold down to fund the income payments, you can stop the pro-rata auto-sell down on the 'maintenance' page after the drawdown account has been set up.

Bank account details for taxable income

See above 'bank account details for PCLS' for guidance.

The screenshot shows a form titled "Bank account details for PCLS". It contains four input fields:

- Account name: J Example (dropdown menu)
- Sort code: 202020 (text input)
- Account number: 12341234 (text input)
- Roll number: (empty text input)

[Submit](#)

And finally

View and print the application summary and relevant documents.

Please remember to send the following documents:

- Application summary.
- Pension transfer form. This form is not prepopulated, please download the [Pension transfer form](#) from the library or send the ceding company's own discharge forms.
- Crystallisation summary, this can be signed by the client, or the adviser on their client's behalf.
- Signed pension drawdown form, if the crystallisation summary has not been signed by the client – this can be signed by the client, or the adviser on their client's behalf

Declarations, do you need them?

New client to Nucleus

An original client signed declaration is required.

Existing Nucleus client applying for a pension

An original signed declaration is required if this is the client's first pension application for Nucleus.

Client topping up their Nucleus pension for immediate drawdown

A new declaration isn't required.

When will I know that the pension drawdown has been processed?

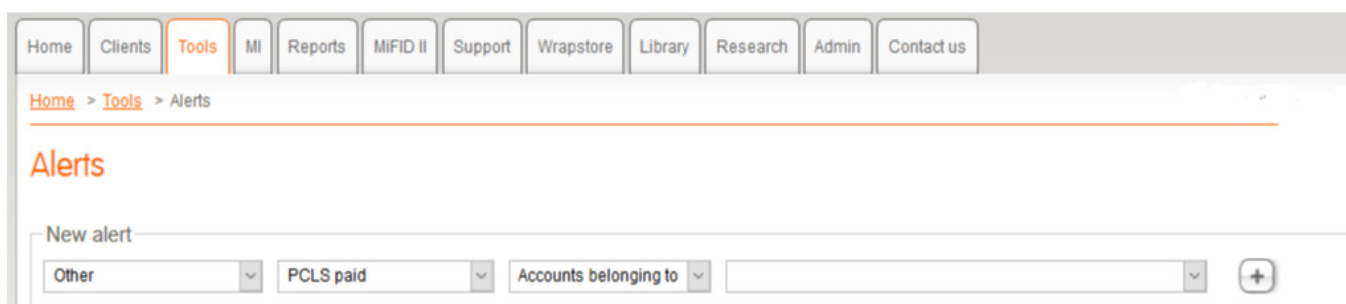

A 'Benefit Drawdown Events' section will appear at the bottom of the clients' pension portfolio page confirming the lifetime allowance percentage used, drawdown value and tax-free lump sum amount.

Benefit Drawdown Events					
Effective date	Trade ID	Lifetime Allowance % Used	Drawdown Value	Tax-Free Lump Sum	Reference
04/04/2014	126229178	40.39	£100,000.00	£25,000.00	100000037

If you want to know when the PCLS has been paid, go to the transaction history in the drawdown account, the date the payment was made will be shown along with the bank account or General account number the money was paid to.

An alert can be set up which will notify you when the PCLS has been paid. To do this go to the tools tab on the platform and select alerts.

You can choose to set up the alert for all accounts or for specific clients.

The screenshot shows the 'Alerts' section of the Nucleus platform. At the top, there is a navigation bar with tabs for Home, Clients, Tools (selected), MI, Reports, MiFID II, Support, Wrapstore, Library, Research, Admin, and Contact us. Below the navigation bar, the breadcrumb trail reads 'Home > Tools > Alerts'. The main heading is 'Alerts'. Underneath, there is a 'New alert' section with a form. The form has three dropdown menus: 'Other', 'PCLS paid', and 'Accounts belonging to'. There is also a plus sign icon to the right of the form.

Further support

You'll now be able to complete an application for immediate drawdown. If you need any further help, please contact your regional client relations manager who'll be happy to assist.
